

“Always on top of the latest wave of technology, Ned has a deep understanding and great desire to implement cutting edge technology and create a trusted technical infrastructure within the organisation. I am confident he can apply his knowledge and experience across full spectre of companies, from ones just starting up to established multi million corporates.”

*Gerald Schwanzer
Managing Director, DSI London*

“Ned brought a wealth of technical and development knowledge which enabled him to contribute to the planning of network infrastructure, and the database structure of internal systems. Combined with a commercially aware and pragmatic approach to the development and implementation of changes.”

*Ross Hammond
Ombudsman, Financial Ombudsman Service*

“I worked with Ned recently on a project which required additional security steps to be developed. Ned was enthusiastic about the brief, great work with and developed the project on time!”

*Kate Georgiou
Group Business Development Manager, The Mill*

Ned Hasovic

Interim CTO / Tech Leader

Ned has held C-level/Tech leadership positions at big corp’s such as John Lewis, SME’s like Dancesport International and Parenta, On demand startups like Blow LTD, Fin-Tech startups like TransferGo. He greatly enjoys enabling companies with a competitive advantage in their vertical using bleeding edge tech elements such as effective Full Circle Agile tech culture, Machine Learning, AI and Blockchain, and equally relishes the opportunity to evolve businesses, remove constraints and improve efficiency with infinite auto scaling and automation. Very much with a hands-on approach, Ned has the rare strength in delivering complex scope tech quantifiably on time with a sophisticated Agile approach and excellent tech leadership technique.

TRANSFORMATION

- Set up or scaled a number of tech deliveries internationally.
- Implemented Agile → Mission Teams, Full circle Agile development, Agile stakeholder management and Automation testing.
- Scaled offshore and onshore teams from zero to full delivery focussing on simplicity, agility and automation.
- Restructured and re-platformed companies facing major technology and structural constraints. Technologies deployed include Amazon Web Services/Google cloud services/Machine learning/Database Sharding/Iron Workers/IronMQ queuing/Serverless/Memcache/MongoDB & MySQL/Magento E-Commerce/Joomla/Wordpress.

DELIVERY

- Led technology teams for industry leaders
- Implemented enterprise software and consumer services on bleeding edge technologies on multiple platforms.
- Created and utilised web and mobile A/B Testing and QA Automation frameworks and Behaviour driven development

RELATIONSHIPS

- Trusted tech advisor for former ambassador to UN and numerous external companies. Trusted by interim.team to fulfill C level roles.
